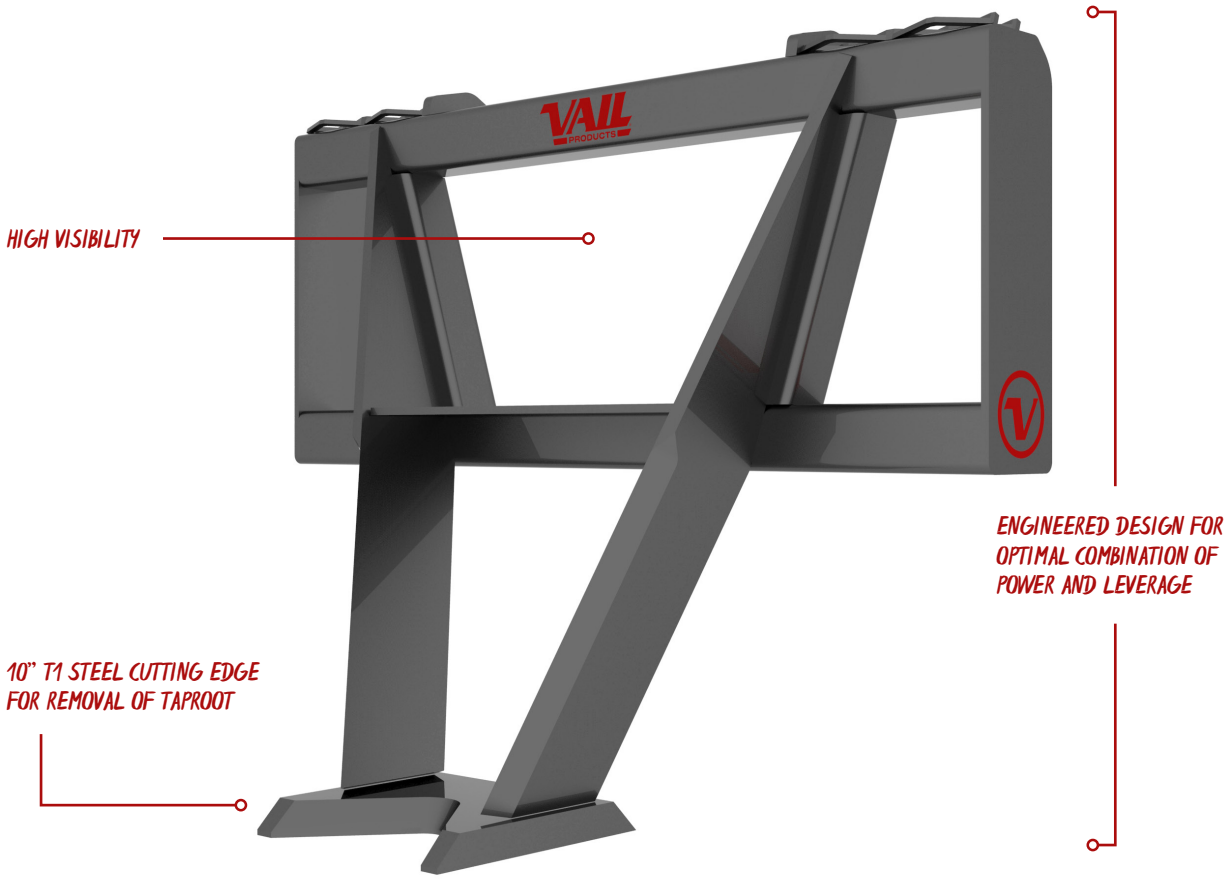
PERMANENT REMOVAL

GRUBBER

MODEL NUMBER: XGR-4610 | **WIDTH:** 46”
LENGTH: 20” | **HEIGHT:** 36” | **WEIGHT:** 250 lb

OVERVIEW


The Vail Products Grubber is designed to eliminate undesirable vegetation by targeting the taproot, thereby hindering any potential regrowth or re-infestation. Establishing a native landscape, be it in a pasture, field, park, or residential lot, first requires the removal of invasive species. Although chemical and biological interventions may yield results in specific instances, professionals contend that the most efficacious approach is through grubbing. For sustained land control, the Grubber is an indispensable tool.
